Access via WLAN hotspot

The password for the WLAN hotspot is:

TechniVolt

Subject: instruction manual page 34

Charge controller

Login/Register

When logging on to the configuration interface for the first time, you will be asked to create a new operator password.

Be sure to remember your new password!

User: operator

Password:

If you lose your password, you will no longer have access to the charging station and it will have to be returned to the factory to be unlocked. To avoid this situation, so-called "master RFID cards" are created.

Make the two RFID cards included within the scope of delivery your master RFID cards.
