Integration FIBARO Home Center 3 / Lite with Rithum Switch

This manual describes the steps for pairing Rithum Switch with the FIBARO PRO smart home system.

Requirements

- FIBARO Home Center 3 (Lite) met FW 5.100 of hoger
- Min. 1 scene(s) in the FIBARO Systeem
- Rithum Switch
- Router with internet

Note: If there is no restriction on the scenes via Rithum, you can also use the administrator's login details. Use the following instruction to add a user with restricted access to the system.

Create user with authorisation

- 1. Ga to Access Control
- 2. Create a new user, for example:
 - 1. User: VIOLET
 - 2. Pw: VIOLET-123!
- 3. Give access to the required scenes
- 4. Save the settings

Integration with Rithum Switch

It is necessary to activate the Switch via a licence, follow the instructions below to activate the FIBARO Core plugin for the relevant Rithum Switch.

- 1. Purchase the license and open the URL, enter the data of the Rithum Switch
- 2. To do this, go to Settings > System > About

Settings	
Network	>
